# Toshiba Power Transistors

Thank you for purchasing Toshiba semiconductor products.

As you may already know, semiconductor products are used in a wide range of fields, both domestic and industrial.

This product guide includes a list of products categorized by functions and applications, a list of packages, tape packing information, a list of lead-formed products, an overall list of devices and a set of package diagrams. We hope that this guide will assist you in selecting products. For further details of specific devices, please refer to the relevant technical datasheets.

## Power Transistor

### Power Transistor SMD Series

With smaller and thinner electronic devices fuelling demand for SMD-type power transistors, Toshiba provides the following packages to meet manufacturers' needs.

- PW-Mini • PW-Mold
- TSM • VS-6 • PS-8 • SMV

### Power Transistors for Switching Power Supplies

Using a crystal mesh pattern, Toshiba has reduced the storage time ( $t_{stg}$ ) and fall time ( $t_f$ ) of 400-V and 800-V power transistors for switching power supplies. In addition, we have developed power transistors in a low-profile package. These types of transistor are suitable for low-output AC adapters and ballast lamp applications.

### Power Transistors for Audio Power Amplifiers

Using a minute pattern and a high-density MET design, Toshiba has achieved high levels of current efficiency. Package type can be selected to yield collector power output ranging from 60 W to 220 W. A wider selection of packages, including the TO-3P(N) and TO-3P(L), is available.

### Low V<sub>CE(sat)</sub> Transistor Series

Toshiba power transistors feature a  $V_{CEO}$  of 10 V to 100 V and an  $I_C$  of 1 A to 7 A, with various surface-mount packages. Ultra-high-speed switching transistors and transistors with SBDs and S-MOSes are also available.

# Switching Transistors in Low-Profile Through-Hole Package

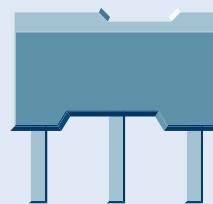

## Features

### Small Size and Light Weight

- Low-profile through-hole package
- Supplied in tape and reel packaging

### Low Power Dissipation and High Efficiency

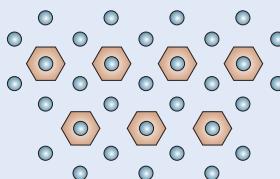

- High-speed switching: Reduced  $t_f$
- High-current amplification: High  $hFE$
- Low standby power: High  $hFE$  at low collector current

MSTM package

Low-profile package

## Transistors for MOS Gate Drivers / Compact Motor Drivers

Low  $V_{CE(sat)}$  PNP and NPN transistors are housed in a single package. This is ideal for use in high-power IGBTs and high-speed gate drives for MOS gate devices such as MOSFETs or compact motor drivers.

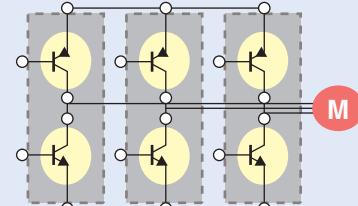

### Example Application Circuits

MOS gate driver

H-bridge motor driver

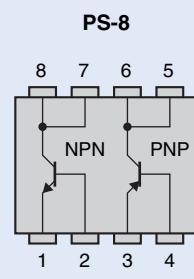

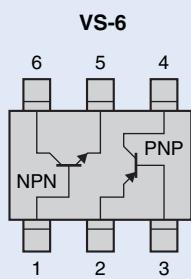

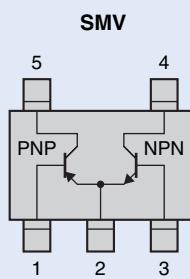

3-phase motor driver

## General-Purpose Load Switches

A Low  $V_{CE(sat)}$  PNP transistor and an S-MOS to drive it are housed in a single package. This is ideal for use in power supply switches to loads.

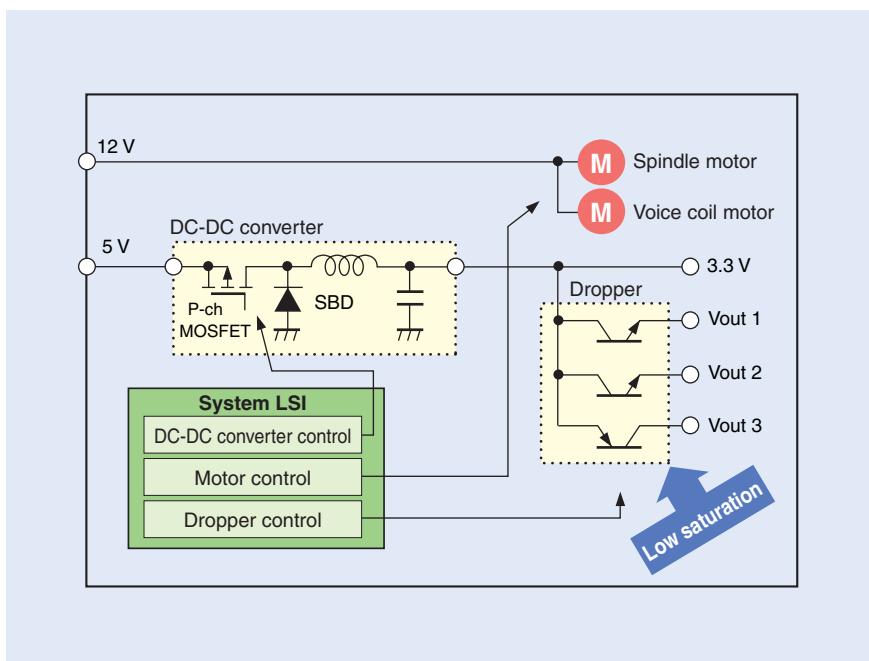

### <Features>

- Low power dissipation due to low  $V_{CE(sat)}$  PNP transistor
- Using an S-MOS to receive signals allows the transistor can be operated directly from a microcontroller.

## For High-Voltage Power Supplies

### Transistors for DC-DC Converters

Toshiba recommends the transistors listed below for use in primary-side switches for power supplies with an input voltage of 24 V. ( $V_{CEO} = 80$  V or higher)

The  $hFE$  ratings are guaranteed even in the low current region. Example:  $hFE = 80$  or higher (at  $V_{CE} = 2$  V /  $I_c = 1$  mA)

- ▶ Toshiba Corporation, and its subsidiaries and affiliates (collectively "TOSHIBA"), reserve the right to make changes to the information in this document, and related hardware, software and systems (collectively "Product") without notice.
- ▶ This document and any information herein may not be reproduced without prior written permission from TOSHIBA. Even with TOSHIBA's written permission, reproduction is permissible only if reproduction is without alteration/omission.
- ▶ Though TOSHIBA works continually to improve Product's quality and reliability, Product can malfunction or fail. Customers are responsible for complying with safety standards and for providing adequate designs and safeguards for their hardware, software and systems which minimize risk and avoid situations in which a malfunction or failure of Product could cause loss of human life, bodily injury or damage to property, including data loss or corruption. Before customers use the Product, create designs including the Product, or incorporate the Product into their own applications, customers must also refer to and comply with (a) the latest versions of all relevant TOSHIBA information, including without limitation, this document, the specifications, the data sheets and application notes for Product and the precautions and conditions set forth in the "TOSHIBA Semiconductor Reliability Handbook" and (b) the instructions for the application with which the Product will be used with or for. Customers are solely responsible for all aspects of their own product design or applications, including but not limited to (a) determining the appropriateness of the use of this Product in such design or applications; (b) evaluating and determining the applicability of any information contained in this document, or in charts, diagrams, programs, algorithms, sample application circuits, or any other referenced documents; and (c) validating all operating parameters for such designs and applications. **TOSHIBA ASSUMES NO LIABILITY FOR CUSTOMERS' PRODUCT DESIGN OR APPLICATIONS.**
- ▶ Product is intended for use in general electronics applications (e.g., computers, personal equipment, office equipment, measuring equipment, industrial robots and home electronics appliances) or for specific applications as expressly stated in this document. Product is neither intended nor warranted for use in equipment or systems that require extraordinarily high levels of quality and/or reliability and/or a malfunction or failure of which may cause loss of human life, bodily injury, serious property damage or serious public impact ("Unintended Use"). Unintended Use includes, without limitation, equipment used in nuclear facilities, equipment used in the aerospace industry, medical equipment, equipment used for automobiles, trains, ships and other transportation, traffic signaling equipment, equipment used to control combustions or explosions, safety devices, elevators and escalators, devices related to electric power, and equipment used in finance-related fields. Do not use Product for Unintended Use unless specifically permitted in this document.
- ▶ Do not disassemble, analyze, reverse-engineer, alter, modify, translate or copy Product, whether in whole or in part.
- ▶ Product shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable laws or regulations.
- ▶ The information contained herein is presented only as guidance for Product use. No responsibility is assumed by TOSHIBA for any infringement of patents or any other intellectual property rights of third parties that may result from the use of Product. No license to any intellectual property right is granted by this document, whether express or implied, by estoppel or otherwise.
- ▶ **ABSENT A WRITTEN SIGNED AGREEMENT, EXCEPT AS PROVIDED IN THE RELEVANT TERMS AND CONDITIONS OF SALE FOR PRODUCT, AND TO THE MAXIMUM EXTENT ALLOWABLE BY LAW, TOSHIBA (1) ASSUMES NO LIABILITY WHATSOEVER, INCLUDING WITHOUT LIMITATION, INDIRECT, CONSEQUENTIAL, SPECIAL, OR INCIDENTAL DAMAGES OR LOSS, INCLUDING WITHOUT LIMITATION, LOSS OF PROFITS, LOSS OF OPPORTUNITIES, BUSINESS INTERRUPTION AND LOSS OF DATA, AND (2) DISCLAIMS ANY AND ALL EXPRESS OR IMPLIED WARRANTIES AND CONDITIONS RELATED TO SALE, USE OF PRODUCT, OR INFORMATION, INCLUDING WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, ACCURACY OF INFORMATION, OR NONINFRINGEMENT.**
- ▶ Do not use or otherwise make available Product or related software or technology for any military purposes, including without limitation, for the design, development, use, stockpiling or manufacturing of nuclear, chemical, or biological weapons or missile technology products (mass destruction weapons). Product and related software and technology may be controlled under the Japanese Foreign Exchange and Foreign Trade Law and the U.S. Export Administration Regulations. Export and re-export of Product or related software or technology are strictly prohibited except in compliance with all applicable export laws and regulations.
- ▶ Please contact your TOSHIBA sales representative for details as to environmental matters such as the RoHS compatibility of Product. Please use Product in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. TOSHIBA assumes no liability for damages or losses occurring as a result of noncompliance with applicable laws and regulations.
