Small Signal MOSFET Arrays

Operational Amplifiers

EPAD<sup>®</sup> Voltage Comparators

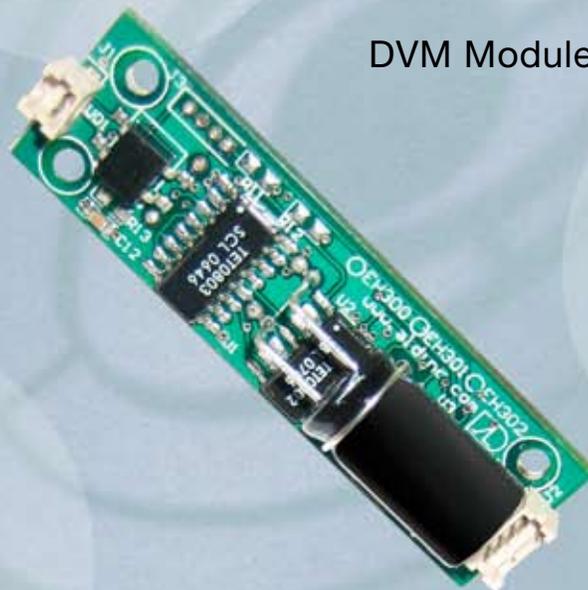

Analog Switches

CMOS Analog Timers

Integrating A/D Converters

Energy Harvesting Modules

DVM Modules & Chipsets

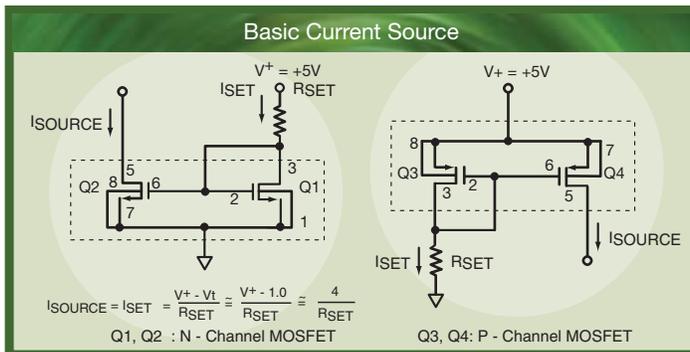

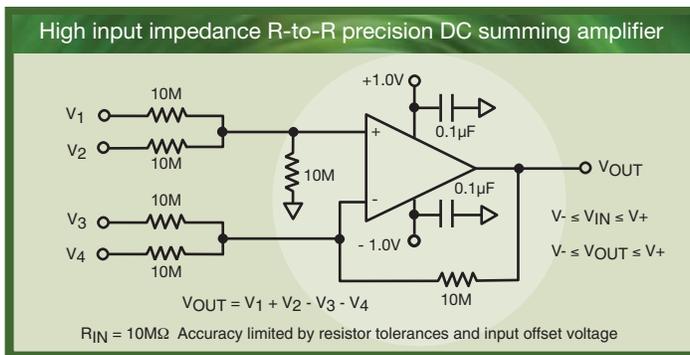

# A Pioneer in the Field of Precision Analog Semiconductors

Founded in 1985, Advanced Linear Devices, Inc. is a leading Silicon Valley manufacturer of precision CMOS analog integrated circuits and specialty system circuit boards employing the company's proprietary EPAD<sup>®</sup> technology. Recognized over the years as an analog pioneer in precision ultra-low

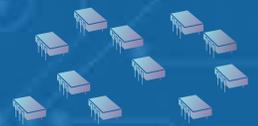

power devices, ALD has introduced many industry first products including CMOS rail-to-rail operational amplifiers, function-specific ASIC program, EPAD MOSFET, 5-1/2 digit DVM chipset, zero threshold MOSFET array, and EPAD voltage comparator. The latest addition to this impressive list is the ALD Energy Harvesting (EH) Module featuring unparalleled high-efficiency energy storage.

the manufacture of precision and ultra low power operation featured in many ALD analog components. In recent years, EPAD has also been expanded into nano-power analog elements found in today's energy harvesting modules and precision digital voltmeter products. This technology is totally transparent to the user with no additional design knowledge or special handling required. Each product performs to full specifications as a standard, off-the-shelf precision analog component that is readily available direct from the factory or through a variety of domestic and international electronic distribution sources. Many EPAD products can also be supplied with optional, user specified threshold voltages as solutions for difficult design challenges.

## EPAD<sup>®</sup> Technology

EPAD<sup>®</sup> (Electrically Programmable Analog Device) is an ALD proprietary semiconductor device (Floating-Gate) trimming technology that contains MOSFET transistors with factory-trimmed precision threshold voltages. Specifically designed and developed over the past twenty years, EPAD has emerged as a unique design element integrated into

## Product Summary & Selection Guide

### **Precision Matched Small Signal MOSFET Arrays**

ALD MOSFET transistor arrays are available in both N-channel and P-channel types with precision matching characteristics.

### **Precision EPAD<sup>®</sup> Matched Small Signal MOSFET Arrays**

ALD EPAD MOSFET transistor arrays are offered with factory-trimmed, precision matching characteristics. This growing family of devices is available in enhancement, zero-threshold and depletion-mode versions with precise turn-on threshold voltages across a voltage range from +5.00V to -5.00V. The zero-threshold-mode features exactly 0.00V threshold voltage—a unique industry first.

### **Precision Operational Amplifiers**

ALD makes a broad line of precision rail-to-rail CMOS operational amplifiers. These devices offer a combination of ultra-low input offset voltages with ultra-low input bias currents. They are available in a variety of operating power ranges and bandwidths, offset voltages, temperature ranges, package types and configuration.

### **Precision Analog IC's**

#### **Ultra Low Input Offset Voltage EPAD<sup>®</sup> Dual CMOS Analog Voltage Comparators**

ALD precision voltage comparators are available as micropower devices with ultra low input offset voltages, ultra low input currents and high output current drivers. These devices offer extremely low input drive requirements and extremely high input-to-output current gains. They are available in a variety of package types and optional performance specifications.

#### **Ultra Low Charge Injection Low Voltage Analog Switches**

ALD CMOS analog switches feature extremely low charge injection and low voltage operation. Current device types available include break-before-make and make-before-break, quad normally-open, quad normally-closed and dual normally-open plus dual normally-closed.

#### **Precision Low Drift Low Power CMOS Analog Timers**

ALD analog low-drift CMOS timers are easy-to-use precision analog timers in single, dual and quad versions with low operating power and high discharge output characteristics.

### **Energy Harvesting Modules and DVM System Boards**

#### **High-Efficiency EPAD<sup>®</sup> Energy Harvesting Modules**

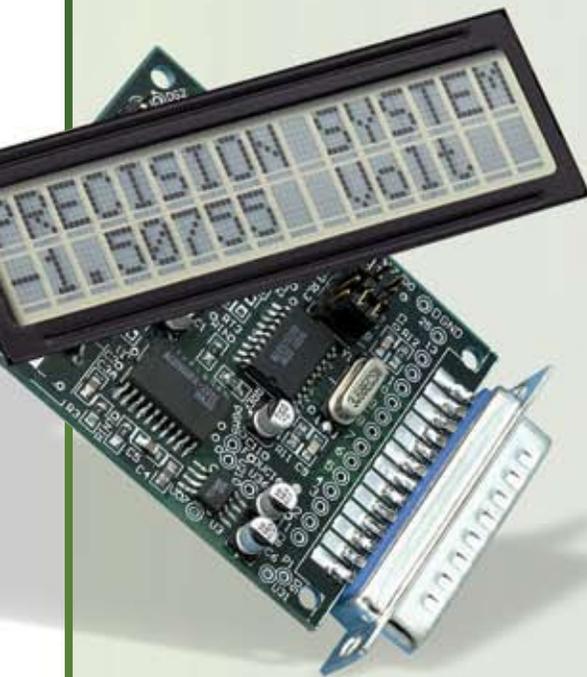

ALD EH300 and EH301 Series Energy Harvesting Modules are nano-power devices designed to power intermittent duty wireless sensor systems. They are used to either replace a battery or supplement a battery charging circuit that eliminates frequent battery replacements. Micropower energy is input to the module from a variety of energy generators including solar cells, piezoelectric, magnetic coil and various thermoelectric materials. Output energy is made available to power most conventional ICs and circuits within their required operating voltages and currents. Specific onboard functions include energy capture, accumulation, storage, power conditioning and management.

#### **± 5 1/2 Digit DVM (Digital Voltmeter) Boards**

ALD MB1, MB201 and MB203 series are low cost, high resolution and high precision measurement engines consisting of functional digital voltmeter (DVM) printed circuit board modules. These modules incorporate on-board ALD500/ALD500R and ALD521D/ALD523D DVM chipsets with associated support and microcontroller-interface circuitry designed for precision embedded DVM display applications.

#### **Dual Slope Integrating Analog Processors and Chipsets**

ALD500 series is a family of monolithic CMOS analog processor chips that implement precision, low power, low noise integrating dual slope A/D converters having a resolution of 16, 17 and 18 bits, plus sign bit and over-range bit. They are ideally suited for a variety of high accuracy line-powered and portable digital multimeter applications requiring 4 1/2 and 5 1/2 digit plus sign measurement resolution. Other members of the product family include precision on-chip voltage-referenced versions and DVM Chipset digital controllers

# Precision Matched Small Signal MOSFET Arrays

- Low threshold voltage<sup>1</sup>
- Patented EPAD<sup>®</sup>Technology
- Low voltage & nanopower circuits
- Near infinite current gain
- Drain source breakdown: 10V min.
- ROHS (leadfree) Compliant
- Temperature range: 0 to 70°C<sup>2</sup>
- Ideal current mirrors and current sources
- Drain source on resistance match: 0.5% typ.

## ALD N-CHANNEL ENHANCEMENT MODE (SO & MSOP packages are surface mount)

1. Optional user specified threshold voltages.

2. Optional industrial temperature range (-40°C to +85°C) or Military temperature range (-55°C to +125°C)

# Precision Operational Amplifiers

- Temp. Range: 0 to 70°C
- Patented EPAD® Technology
- Class AB output drivers
- Rail-to-rail input and output

- Voltage Supply Aux. max. 12(± 6)V
- Symmetrical complementary outputs
- Ultra-low input offset voltage
- Ultra-low input bias currents

- Unity gain stable
- High temperature stable
- Cable driver
- Ringing free

## ALD OPERATIONAL AMPLIFIERS - INSTRUMENT GRADE, OSCILLATION FREE

## PRECISION LOW DRIFT, LOW POWER, ANALOG TIMERS WITH HIGH DISCHARGE OUTPUT

• Precision • High Input Impedance • Temperature Range: 0 to 70°C • Timer Accuracy: Typ. 1%  
• High Speed • Stable with Supply Voltage Changes • Temperature Drift: Typ. 10ppm /°C

Part No.	Description	Package	Type	Supply volt. Drift (Typ.)(%V)	Discharge Output Voltage/current (V)/(mA)	Supply Voltage		Supply Current Per Comp max. (µA)
						Min. (V)	Min. (V)	
ALD1502PAL	Micropower CMOS Timer	DIP-8	Single	0.2	1.0 @ 80	2	2	90
ALD1502SAL	Micropower CMOS Timer	SO-8	Single	0.2	1.0 @ 80	2	2	90
ALD2502PBL	Micropower CMOS Timer	DIP-14	Dual	0.2	1.0 @ 80	2	2	90
ALD2502SBL	Micropower CMOS Timer	SO-14	Dual	0.2	1.0 @ 80	2	2	90
ALD4501PEL	Micropower CMOS Timer	DIP-20	Quad	0.1	1.0 @ 40	2	2	67.5
ALD555PAL	CMOS Timer	DIP-8	Single	0.1	1.0 @ 80	2	2	180
ALD555SAL	CMOS Timer	SO-8	Single	0.1	1.0 @ 80	2	2	180

# Energy Harvesting Modules and DVM System Boards

## EPAD® ENERGY HARVESTING™ MODULES

Advanced Linear Devices' EPAD ENERGY HARVESTING™ Modules can accept energy from many types of electrical energy sources and store this energy to power conventional 3.3V and 5.0V electrical circuits and systems. They are completely self-powered, always in the active mode and intended for low power intermittent duty cycle sampled data or condition-based monitoring/extreme lifespan applications.

Part No.	Description
EH300	1.8V to 3.6V, 4.6mJ, 68msec@25mA
EH300A	1.8V to 3.6V, 30mJ, 75msec@150mA
EH301	3.1V to 5.2V, 8.3mJ, 80msec@25mA
EH301A	3.1V to 5.2V, 55mJ, 88msec@150mA
EHJ1C	Two wire, 6 inch Cable for EH300/EH301 w/connector
EHJ2C	Four wire, 6 inch Cable for EH300/EH301 w/connector
EH300KIT	Evaluation Kit (One each of EH300 and EH300A, Two each EHJ1C/EHJ2C cables)
EH301KIT	Evaluation Kit (One each of EH301 and EH301A, Two each EHJ1C/EHJ2C cables)

## ALD ± 5 1/2 DIGIT DVM (DIGITAL VOLTMETER) BOARDS FULLY ASSEMBLED, TESTED AND CALIBRATED

Part No.	Description	FS Input Range (DCV)	Input Impedance (min) (Ohm)	Conv./Sec (Min/Max)	Linearity (Max) (%)	Display Settings (Max)	Scale Factors (Max)
MB1S	±2.00000 DCV, with 0.01% Accuracy	±2.00000	1 G Ohm	0.01667 / 10	±0.005	---	---
MB201A2V	±2.00000 DCV, with 0.02% Accuracy	±2.00000	1 G Ohm	0.01667 / 10	±0.01	---	---
MB201A20V	±20.0000 DCV, with 0.02% Accuracy	±20.0000	10 M Ohm	0.01667 / 10	±0.01	---	---
MB203A2V	±2.00000 DCV with 0.02% Accuracy + LCD Display Interface	±2.00000	1 G Ohm	0.00833 / 10	±0.005	3 sets	3 sets
MB203A20V	±20.0000 DCV with 0.02% Accuracy + LCD Display Interface	±20.0000	10 M Ohm	0.00833 / 10	±0.005	3 sets	3 sets

## ALD DVM BOARD ACCESSORIES

Part No.	Description	Dimension (in.)
MBCDROM	Design Manual/Software Kit for MB Boards	Standard CD
MB203LCD	2x 16 Character LCD Module w/cable/connector for MB203 Board	3.15 x 1.42 x 0.43
MB203LCD-1	2x16 Character LCD Module (green LED) w/cable/connector for MB203 Board	3.15 x 1.42 x 0.43

## ALD 17/18 BIT, PLUS SIGN, DUAL SLOPE INTEGRATING ANALOG PROCESSORS

• System Integrating ND Processor • Max 1mA Supply Current • Typ. Input Current 2pA • Temp. Range, 0 to 70° C • Nom. Supply Voltage: +/-5V

Part No.	Description	Package	End Point Linearity (Max) (%)	Resolution (± Bits)	Zero-Scale Error (Max) (ppm)	Zero-Scale Tempco (Max) (ppm/°C)	Full-Scale Tempco (typ) (ppm/°C)	Full-Scale Rollover Error (typ) (%)
ALD500AUPCL	18 bit	DIP-16	0.005	±18	25	0.3	1.3	0.005
ALD500AUSCL	18 bit	SO-16	0.005	±18	25	0.3	1.3	0.005

ALD500RAU-20SEL	18 bit w/ 20 ppm V Ref	SO-20	0.005	±18	25	0.3	1.3	0.005
ALD500APCL	17 bit	DIP-16	0.01	±17	30	0.35	1.3	0.008
ALD500ASCL	17 bit	SO-16	0.01	±17	30	0.35	1.3	0.008
ALD500ASWCL	17 bit	Wide SO-16	0.01	±17	30	0.35	1.3	0.008
ALD500AUSWCL	18 bit	Wide SO-16	0.005	±18	25	0.3	1.3	0.005

## ALD DIGITAL CONTROLLERS FOR DUAL SLOPE INTEGRATING ANALOG PROCESSORS (PC and uP Interface)

Part No.	Description	Package	No. of Digits (Max)	Resolution (Bits + Sign)	Conv./sec. (Min / Max)	Unit Conv.	LCD/VFD Display (characters)	Display Settings (Max)	Scale Factor	Supp. Curr. (Max) (mA)
ALD521DSDL	24 Bit	SO-18	---	23 + Sign	1 / 15	---	---	---	---	---
ALD521DPDL	24 Bit	DIP-18	---	23 + Sign	1 / 15	---	---	---	---	---

## PC AND μP INTERFACE OR STAND-ALONE OPERATION

• 22 Bit Serial to 7 digit decimal conversion • Direct Character Display Interface

Part No.	Description	Package	No. of Digits (Max)	Resolution (Bits + Sign)	Conv./sec. (Min/Max)	Unit Conv.	LCD/VFD Display (characters)	Display Settings (Max)	Scale Factor (Max)	Supp. Curr. (Max) (mA)
ALD523DSHL	24 Bit wA_CD Display Controller	SO-28	±9999999	23 + Sign	1 / 10	Built-in	1x16 or 2x16	3 sets	3 sets	8
ALD523DPHL	24 Bit w/LCD Display Controller	DIP-28	±9999999	23 + Sign	1 / 10	Built-in	1x16 or 2x16	3 sets	3 sets	8

## Markets & Applications

ALD's high quality linear components and board level products serve a broad spectrum of industries and feature many unique operating characteristics, such as precise voltage and current thresholds, ultra-low operating power and ultra-low input loading. Markets include Industrial Controls, Instrumentation, Computers, Portable Devices, Medical, Automotive, Telecom, Military, and Aerospace—many which demand high temperature and ruggedized operating environments.

Actual applications enabled by the company's technology and low-power products include integrated MEM-based pressure sensors, enhanced crystal radios, energy-harvesting power supplies, mixed-signal communications equipment, precision panel meters, high temperature engine controllers, precision machine controls (lathe and drilling platforms), remote barcode processors, telecommunication sub-systems, oil field instrumentation and navigation systems.

## Application Specific IC and User-specified Threshold Voltages

ALD's linear components are available as a standard-cell design kit for "Function-Specific" IC Integration where combined digital logic functions and passive parts, can be integrated onto a single custom IC chip. EPAD MOSFET transistors can also be supplied with individual (factory programmed) user-specified threshold voltages.

## Sales and Service

ALD markets its products globally through a network of manufactures representatives and traditional distribution networks as well as various on-line distribution sources. For the location of your nearest authorized sales office, visit our website at [www.aldinc.com](http://www.aldinc.com).

## Lead-Free, RoHS and "Green" Mold Compound Compatible

ALD Lead (Pb)-Free semiconductor products are suitable for use in specified lead-free processes and compatible with the current RoHS requirements for all six substances, including the requirements that lead not exceed 0.1% by weight in homogeneous material. ALD also supplies "Green" Mold Compound that is considered environmentally friendly.

## Legacy and Leaded Products

For legacy products, high-reliability products, or for customers who simply do not wish to convert to RoHS requirements, ALD is also committed to tap a vast network of legacy materials and processes to continue to support leaded products. These products feature solder-dipped/plated leads to work with SN60/PB40 solder.

## ISO-9001 Certified

ALD implements the Quality Systems and Management concepts of the ISO-9001 International Standards for quality, and has established a Corporate Quality Policy and Quality Objectives that is the basis of our commitment to maintain world class supplier status.
