# Z/A/X/DZ Common Accessories

# **Ordering Information**

# Terminal Covers (Sold Separately)

#### Common to Z, A, X, and DZ Models

The Terminal Cover is secured using the switch's side mounting screws and protects the casing and terminal wires from dust, vibration, or fingers, thus preventing terminal short-circuiting, ground faults, wire disconnection or improper connection, and electric shock accidents.

Terminal Covers made of phenol resin have five or six thin wall sections.

These sections can be torn open to provide holes for lead cables at desired points.

Ar	plication	Soldering terminal use	Remarks				
Material	Mounting direction	Мо	nemarks				
Phenol resin	Side mounting	AP-A	AP-B				
Metal press mold	Side mounting	AP1-A	Used for AP-A and AP-B				
Vinyl chloride	Side mounting	AP					

Note: Use the 'Screw-terminal use' Terminal Cover for DZ-series solder terminal models.

# Separator (Sold Separately)

#### Common to Z, A, X, and DZ Models

Model: Separator for Z

## Actuators (Sold Separately)

#### Common to Z and X Models

Pin Plunger Switches might need to be actuated by a cam or similar object, in which case, use one of the following Actuators according to the application.

Actua	tor	Common to Z and X models						
Hinge lever		ZAA-1						
Hinge roller lever		ZAA-2						
Panel mount plunger	Short	ZAQ-3						
. č	Medium	ZAQ-2						
	Long	ZAQ-1						
Panel mount roller plunger		ZAQ-22						

Note: ZAQ-22 is constructed of ferrous material. Therefore, it cannot be used with the X Switch, because of the permanent magnet contained within those models. Use the ZAQ-22 external panel mount roller plunger only with the Z or DZ switch.

# OMRON

# **Dimensions**

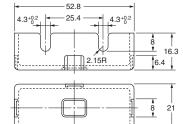

Note: Unless otherwise specified, all units are in millimeters and a tolerance of ± 0.4 mm (±0.8 mm for the AP-Z) applies to all dimensions.

#### Terminal Covers

Soldering Terminal Use (Phenol Resin)

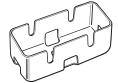

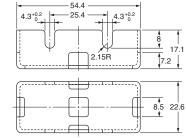

The Cover has five thin, easy-to-separate portions for easy lead wire connections. Note:

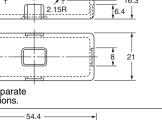

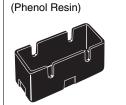

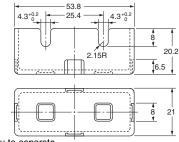

Note: 1. The Cover has five holes for easy lead wire connections. 2. AP1-A should be used with the AP-A

Screw Terminal Use

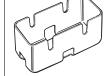

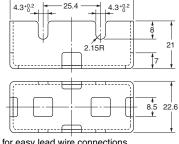

Note: The Cover has six thin, easy-to-separate portions for easy lead wire connections.

AP1-B

AP-B

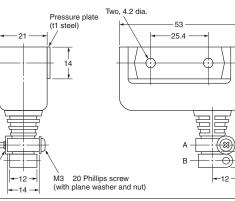

55.4

Note: 1. The Cover has six holes for easy lead wire connections. 2. AP1-B should be used with the AP-B

#### AP-Z

Soldering or Screw Terminal Use (Vinyl Chloride)

**Cable Pull-out Dimension** 

A-A	cross-section	E
† 15 ↓	8 dia.	-

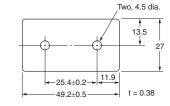

B-B' cross-section 6 dia D

Note: A 6-dia. or 8-dia. cable can be used by cutting the cable pull-out hole to the size of the cable to be used.

#### Separator

#### SEPARATOR FOR Z

Nut

Note: The separator's material is EAVTC (Epoxide Alkyd Varnished Tetron Cloth) and its heat-resisting temperature is 130°C.

### Actuators

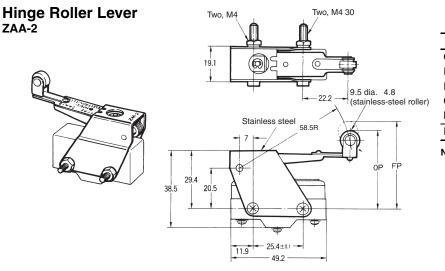

Note: 1. Unless otherwise specified, all units are in millimeters and a tolerance of  $\pm$  0.4 mm applies to all dimensions.

2. These Actuators are not provided with Switches.

Model	Z-15G-B	X-10G-B
OF max.	500 gf	500 gf
RF min.	170 gf	170 gf
PT max.	6 mm	6 mm
OT min.	12.7 mm	12.7 mm
MD max.	2.2 mm	3.3 mm
FP max.	32.9±1.6 mm	

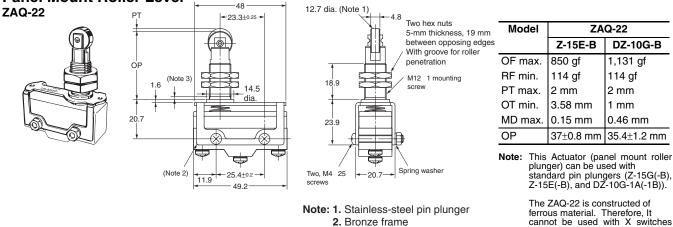

This Actuator can be used with the Z-15G(-B) and X-10G(-B). When mounting the Switch, set Note: the overtravel to between 32% and 100%, taking into consideration the operating body and the dis-tance between the Actuator and the dog.

Model	Z-15G-B	X-10G-B
OF max.	500 gf	500 gf
RF min.	170 gf	170 gf
PT max.	6 mm	6 mm
OT min.	12.7 mm	12.7 mm
MD max.	2.2 mm	3.3 mm
FP max.	44.5±1.6 mm	

Note: This Actuator can be used with the Z-15G(-B) and X-10G(-B). When mounting the Switch, set the overtravel to between 32% and 100%, taking into consideration the operating body and the distance between the Actuator and the dog.

#### Panel Mount Roller Lever

2. Bronze frame

3. Incomplete screw section part with a maximum of 1.5 mm.

due to the permanent magnet used

within those models.

Note: 1. Unless otherwise specified, all units are in millimeters and a tolerance of  $\pm$  0.4 mm applies to all dimensions. 2. These Actuators are not provided with Switches.
